Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 February 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Leung (US Patent 6,963,918 B1) in view of Igarashi et al (US Publishing 2001/053694 A1).

Regarding to claim 11, Leung discloses a method of transmitting a packet in a wireless network (fig. 2), the method comprising receiving the packet from a mobile station 210 at a node 204 for routing the received packet to a service provider server 226 (col. 5 lines 2-8); determining a care of address for at least one of a user and a session associated with the packet (col. 5 lines 28-32); and selectively causing the node to assume a role of a home network for the mobile station based on the care-of-address (col. 5 lines 32-35; based on the care of address, the packet is forward to the FA 204 rather than the HA 224 and thus the FA 204 act as the home agent).

Leung fails to teach determining a predetermined policy for at least one of a user and a session associated with the packet to selectively use default information for obtaining a transmission route of the received packet to the service provider server.

However, Igarashi discloses a network system that provides each terminal user with differentiated service, comprising determining a service profile (predetermined

policy) for a user and a session associated with the packet to obtain a transmission route using the packet header (fig. 20 page 7 paragraphs 0120-0122).

Thus, it would have been obvious to a person of ordinary skill in the art to employ such service profile as taught by Igarashi in Leung's system to determine the optimal route of the packet.

Response to Arguments

3. Applicant's arguments filed February 1, 2007 have been fully considered but they are not persuasive. In response to applicant's argument on page 9-10, Igarashi fails to teach for "selectively use default information for obtaining a transmission route of the received packet to the service provider server". In response, the examiner would like to point out as cited in the applicant's Remark section page 10, Igarashi indeed teaches of using the packet header for obtaining a transmission route. In addition, the limitation "default information" has no distinct bound or value. As a result, the broadest interpretation is given here, which the examiner equated "the packet header" to the "default information" of the claim. Thus, based on the reasons set forth here the rejection is maintained.

Allowable Subject Matter

4. Claims 1-10 and 12-23 are allowed.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2616

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc T. Duong whose telephone number is 571-272-3122. The examiner can normally be reached on M-F (9:00 AM-6:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy D. Vu can be reached on 571-272-3155. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
